

Create Config Map

```
oc create cm cm-redhat --from-literal user=manuel --from-literal database=items
```

Create Secret

```
oc create secret generic cm-secret --from-literal=password=mypa55 --from-literal=root_password=r00tpa55
```

Extract secret from OCP

```
oc extract secrets/cm-secret --to ./meme.yml --confirm
```

Set Config Map env variable for deployment

```
oc set env deployment/custom-app -c rene-db --from cm/cm-redhat --prefix MYSQL_
```

Set Secret env variable for deployment

```
oc set env deployment/custom-app -c rene-db --from secrets/cm-secret --prefix MYSQL_
```
